LYNCHBURG CITY COUNCIL Agenda Item Summary

MEETING DATE: May 27, 2003, Work Session AGENDA ITEM NO.: 1

CONSENT: REGULAR: X CLOSED SESSION: (Confidential)

ACTION: INFORMATION: X

ITEM TITLE: Tyreeanna/Pleasant Valley Neighborhood Plan Update

<u>RECOMMENDATION:</u> Request City Council feedback on Tyreeanna/Pleasant Valley Neighborhood Draft Plan..

SUMMARY:

This presentation/discussion allows Council preliminary review of draft plan prior to public hearing on July 8, 2003, and adoption of the Tyreeanna/Pleasant Valley Neighborhood Plan, as a part of the City's Comprehensive Plan.

PRIOR ACTION(S):

- Planning Commission: May 20, 2003 and February 26, 2003
- ? Public Workshop: February 24, 2003
- ? Neighborhood Plan Steering Committee: seven members representing the neighborhood have met: November 4, 2002; January 6, 2003; February 10, 2003; May 5, 2003.
- Public Works/Utilities Neighborhood Meeting: November 11, 2002

FISCAL IMPACT:

Once the Neighborhood plan is adopted, there will be an impact on the City's Capital Improvement Program. Specific cost figures will be developed as items recommended in the plan are put into the CIP.

MEMORANDUM

The Department of Community Planning & Development Planning Division 847-1508

To: Members of the City Council

From: Judith C. Wiegand, Senior Planner

Subj: Issues & Approaches in Draft Tyreeanna/Pleasant Valley Neighborhood Plan

Date: May 27, 2003

	Major Neighborhood Issues	Possible Solution(s) in Neighborhood Plan
1	Major increase in traffic on Route 460 (Richmond Highway) when Madison Heights Bypass opens in late	Short-term: no circulation network to keep neighborhood (local) traffic off of Route 460. Long-term: Plan proposes looping
	2005/early 2006. Creates major safety and traffic circulation problems, such as difficulty experienced by neighborhood residents trying to get across Route 460.	neighborhood roads; will require an interchange in the vicinity of the Concord Turnpike/Route 460 intersection and an overpass to carry Holcomb Path/Tyreeanna Road over Route 460. Serious design problems involved, plus lack of funding.
2	Changes in access patterns along segment of Route 460 between merge with new Route 460 and Campbell Avenue interchange to encourage use of Route 460 as "western route" for eventual Lynchburg Bypass.	The current design raises safety issues that will only get worse with additional traffic. Access Management Study results: remove driveways, entrances, and median crossovers whenever possible by encouraging alternate access from interior roads. Plan: having real difficulty locating interior roads and connecting them across Route 460.
3	New development likely to be attracted to the area by the increased traffic, especially travel service businesses (e.g., service stations and fast food outlets). Difficulty finding a location that will be both attractive to developers and not destructive to the neighborhood.	"Village Center" area proposed in plan. Encourage all new commercial development to locate in this area. However, road access and lack of sewer service are problems.

4	Uncertainty about possible future	VDOT still looking for funds to make safety
	VDOT recommendations for other	improvements on Route 460 between merge
	improvements on Route 460, such	and Campbell Avenue interchange. Local
	as looping the road around the	VDOT officials have expressed desire to revisit
	neighborhood.	four alternative routes and choose one.
5	Lack of City sewer service in major	Provision of service to remaining areas would
	portions of the neighborhood restricts	require pump station(s) due to topography.
	further development.	Would be first pump stations in City system.
	Tararer development.	Issue of who pays. Preliminary layouts and
		cost estimates indicate system would not pay
		for itself.
		Some homes experiencing septic system
		failure—potential negative impact on nearby
		residences and property values.
		Policy Question: does the City want to provide
		sewer service to encourage economic
		development and neighborhood revitalization in
		an area like this? There are other areas in the
		City facing the same difficulty.
6	Ongoing problems with odor and litter	Odor is now primarily due to sludge disposed in
•	from the current City landfill.	landfill.
	norn the current only landilli.	Policy Question: does the City wish to continue
		disposing of sludge in the landfill or look for an
		alternative means of disposal?
		Litter from landfill is cleaned up by staff
		periodically. Other litter comes from trash
		blowing off trucks on way to landfill (not City
		trucks). Need to crack down on uncovered
		loads.
7	Possible post-closure uses for	Plan includes a list of short- and long-term
	current City landfill after it is closed	uses. Selection process to choose one or more
	and capped in 2014.	uses needs to begin as soon as possible in
	от то тори и то	order to allow sufficient time to make and get
		approval for any necessary changes in landfill
		closure plan. Selection process to be led by
		Parks & Recreation and Public Works depts.
8	Concerns about location, design, and	Design needs to address:
	operation of the future City landfill.	? Will new landfill be visible from Madison
		Heights bypass bridge?
		? Will landfill be visible from James River?
		? Screening adjacent neighborhoods from
		view of landfill, litter, and odors (if any).
		? Providing adequate berms and vegetation
		around landfill to screen it.
9	Neighborhood residents' opinions of	Neighborhood Plan will outline ways to deal
	their treatment by the City since	with issues; City follow-through will have a
	annexation in 1976.	major impact on residents' opinion of City.
